

Ms. Boner worked on Theater Wide contracts providing services to various Forward Operating Bases (FOB) throughout Iraq. One of her most unforgettable memories was when her team had to fly to another FOB to provide direct support and education on a government contract. The opportunity to use her skills in an environment such as Iraq is invaluable and the friendships made are lasting. Her permanent position is Cell Chief for the MEDCOM Health Care Acquisition Activity, Southern Regional Contracting Office at Fort Hood, Texas, where she and her team provide medical contracting support for Carl R. Darnall Army Medical Center.
